

REPORT ON UPDATE OF
AGRICULTURAL DISTRICT DATA

Prepared By
Ernest J. Cole

November 1978

No. 78-25

North East Appraisals and Management Co., Inc.
Ithaca, New York
For The
Agricultural Resources Commission

It is the policy of Cornell University actively to support equality of educational and employment opportunity. No person shall be denied admission to any educational program or activity or be denied employment on the basis of any legally prohibited discrimination involving, but not limited to, such factors as race, color, creed, religion, national or ethnic origin, sex, age or handicap. The University is committed to the maintenance of affirmative action programs which will assure the continuation of such equality of opportunity.

REPORT ON UPDATE OF AGRICULTURAL DISTRICT DATA

With the eight year review of Agricultural Districts imminent, it has been felt that data collected at the time of review of each district should be updated to correspond with the current economic dollar output guide factor used for 1978 and 1979 to compute, by enterprise, the data for each district.

A review of these data disclosed some inaccuracies in tabulation and computation. These errors were researched and corrected so that data in various files will correspond.

Once this accurate base was established the updating by enterprise was accomplished. Therefore, the resulting data that follows reflects the statistics on all farms included in agricultural districts from the formation of the initial district in 1972 through those included in the August 15, 1978 report of the Agricultural Resources Commission. These statistics as now updated are based on the economic level for this current period of 1978-1979.

TABLE I

Table I below reports by county the number of districts, the number of farms in each district, total acres in the district and the total output for all farms in the district, with this information in each category totaled for the county.

TABLE III

Table III reports by major farm enterprise the number of farms and total output of these farms. It further reflects the relative proportion of these various enterprises by indicating the percent of total farms and percent of total output by enterprise.

TABLE IV

These statistical figures as reported in Table IV are the corrected and updated final total figures that should replace the "Grand Total" figures on Supplement #35 for August 15, 1978.

These should be the "Previous Totals" used when preparing Supplement #36. Since current District Review Reports are being calculated on the basis of the 1978-1979 Dollar Output Guide, this data will correspond in values to these updated totals when added in future reports beginning with Supplement #36.
